## **About CCST**

CCST is a non-profit organization established in 1988 at the request of the California State Government and sponsored by the major public and private postsecondary institutions of California and affiliate federal laboratories in conjunction with leading private-sector firms. CCST's mission is to improve science and technology policy and application in California by proposing programs, conducting analyses, and recommending public policies and initiatives that will maintain California's technological leadership and a vigorous economy.

2.5. Wastewater Characterization and Management .....	86
2.5.1. Overview of Oil and Gas Wastewaters.....	86
2.5.2. Recovered Fluids Generated from Stimulated Wells in California.....	88
2.5.2.1. Quantities of Recovered Fluids.....	88
3.5.2.3. Management of Recovered Fluids.....	94
2.5.3. Produced Water Generated from Stimulated Wells in California.....	94
2.5.3.1. Quantities of Produced Water.....	94
2.5.3.2. Chemical Constituents of Produced Water.....	96
2.5.3.3. Management of Produced Water.....	98
2.5.3.3.1. Produced Water from Onshore Oil and Gas Operations.....	98
2.5.3.3.2. Produced water from Offshore Oil and Gas Operations .....	102
2.6. Contaminant Release Mechanisms, Transport Pathways, and Driving Forces .....	103
2.6.1. Overview of Contaminant Release Pathways .....	103
2.6.2. Potential Release Mechanisms to Water in California .....	104
2.6.2.1. Use of Unlined Pits for Produced Water Disposal.....	110
2.6.2.2. Injection of Produced Water into Protected Groundwater via Class II Wells .....	113
2.6.2.3. Reuse of Produced Water for Irrigated Agriculture .....	114
2.6.2.4. Treatment and Reuse of Oil and Gas Industry Wastewater .....	115
2.6.2.5. Disposal of Produced Water in Sanitary Sewer Systems.....	116
2.6.2.6. Leakage through Hydraulic Fractures.....	117
2.6.2.7. Leakage through Failed Inactive (Abandoned, Buried, Idle or Orphaned) Wells.....	122

## Table of Contents
