

## Appendix O

# Water Volume Per Stimulation Event

The available data regarding the volume of water used per stimulation were aggregated from FracFocus, CVRWQCB well work, SCAQMD well work, and the well stimulation disclosures. For some wells, multiple values were available. If the volume was different and the dates sufficiently different, these were judged to be refracturing operations and were included. If the volume or date was the same, these were judged to be two records regarding the same operation. Judgment was used in selecting which data to include. The full data can be found at <http://ccst.us/publications/WST>.
