Power Output listed is Conducted. Professional installation required. The antenna used
for this transmitter must be installed to provide a separation distance of at least 20 cm
from all persons and must not be co-located or operating in conjunction with any other
antenna or transmitter. End-users and installers must be provided with antenna
installation instructions and transmitter operating conditions for satisfying RF exposure
compliance.

20: All electrical and mechanical devices employed for spurious radiation suppression, including any modifications made
during certification testing, must be incorporated in each unit marketed.
