

CCST EXPERT BRIEFING

CALIFORNIA WILDFIRES:

Evidence-based Forest Management Strategies for Improved Wildfire Resilience

Join CCST for a discussion with a team of experts from CSU Chico, UC Berkeley, UC Cooperative Extension, CalFire, and the US Forest Service who are studying ways to improve the resilience of California's forests.

Thurs. June 6th
2:00 - 3:00 pm
Capitol Rm. 437

Photo: Central Sierra Nevada mixed conifer forest pre- and post-treatment with thinning and prescribed burns. Credit: Modified from UC Berkeley

- **How** has the resilience of our forests changed over the last century?
- **What** are effective ways to scale up forest management to impact the whole landscape?
- **How** can prescribed and managed fires be used to promote biodiversity?

Presented in partnership with:
THE OFFICE OF ASSEMBLYMEMBER JIM WOOD
