

Housing Costs, Insurance Rates, and Rebuilding After Disasters

Series | Climate Change and Human Mobility

The second in a year-long series exploring the challenges and solutions of climate- and disaster-driven human mobility.

Wednesday

June 4

12pm PT

ZOOM

Recent disasters have prompted us to rethink how and where we build, and challenged policymakers to develop strategies to protect assets, minimize costs, reduce community displacement, and prevent future catastrophic losses. Moderated by America Adapts host Doug Parsons, the second briefing in our climate change and human mobility series explores how disasters are affecting the costs of housing, insurance rates, and decisions by communities on whether to move away from at-risk areas.

Held in partnership with:
